Reviewer’s report

Title: Assessment of measles Immunity among Infants in Maputo City, Mozambique.

Version: 3  Date: 1 October 2008

Reviewer: Claude P. Muller

Reviewer’s report:

Jani et al. have revised their manuscript entitled « Assessment of Measles Immunity among Infants in Maputo City, Mozambique » a second time. All comments have now been properly addressed and the manuscript is now suitable for publication.

Discretionary Revisions

On page 13 the authors state that: “The test used in this study is robust and highly specific for measles IgG.” On the other hand they say that “The main limitations of these tests are posed by difficulties in obtaining sufficient volumes of oral fluid from infants and by the relatively low sensitivity and specificity of the IgG assay.(Page 14)” I would recommend to adapt or remove the corresponding sentence on page 13.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
