Reviewer's report

Title: Characteristics of HIV Seroprevalence of Visitors to Public Health Centers Under the National HIV Surveillance System in Korea: Cross Sectional study

Version: 5 Date: 14 April 2009

Reviewer: Guido Silvestri

Reviewer's report:

I read the correspondence between the Authors of the below referenced manuscript and Dr. Dougan. I feel that the Authors' revision and response to the second wave of Dr. Dougan's comments is perfectly adequate, and I would recommend publication of this paper.
