Reviewer’s report

Title: The contribution of childhood circumstances, current circumstances and health behaviour to educational health differences in early adulthood.

Version: 2 Date: 11 September 2008

Reviewer: Johan Fritzell

Reviewer’s report:

The revised paper is much clearer in content and much more balanced including a more thorough discussion on both its strenghts and weaknesses. I definitely find that the atuhors have answered my earlier points sufficiently well to allow their manuscript to be published.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
