Reviewer's report

Title: Review of the available essential health information in India

Version: 1 Date: 20 January 2009

Reviewer: sreekumaran nair

Reviewer's report:

1. Major compulsory revision

This article consolidate lot of useful public health data sources in India. However there nothing significant to qualify as a publication in the present form.

Present title 'Review of the available essential health information in India' gives an impression that the whole available health information has been reviewed. The fact is that information available through net only been reviewed.

Authors should have conducted a systematic review with proper methodology, search strategy, keywords etc.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
