Reviewer's report

Title: Individual, Social Environmental and Physical Environmental Correlates with Physical Activity among Canadians: a Cross-sectional Study

Version: 2 Date: 29 September 2008

Reviewer: Ester Cerin

Reviewer's report:

The authors have been very responsive to the reviewers' comments and have done a good job addressing these.

Major Compulsory Revisions
None

Minor Essential Revisions

The language could be improved. For example, the authors should refer to 'perceived barriers to PA' rather than 'perceived barrier to PA' throughout the manuscript. They should also be consistent in the use of terminology such as socio-ecologic models (they sometimes refer to social-ecological models). They should use the past tense throughout the Results section. 'The odd of having sufficient PA' should read 'the odds of having sufficient PA'. The phrase 'should target on self-efficy ...' should read 'should target self-efficacy'.

Discretionary Revisions
None

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
