Reviewer’s report

Title: Seasonal variance of 25-(OH) vitamin D in the general population of Estonia, a Northern European country

Version: 3 Date: 2 December 2008

Reviewer: Kevin D Cashman

Reviewer’s report:

The authors have addressed the majority of the issues I raised and should be published. Two small (minor essential revisions) that persist are 1) the need to indicate the posthoc comparisons in Table 2 (are the mean differences between the different groupings significant. The Tukey’s should indicate a P-value for each comparison), and 2) Figure 2 should use 25(OH)D rather than just 25(OH).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
