Reviewer's report

Title: The association of levels of physical activity with metabolic syndrome in rural Australian adults

Version: 2 Date: 8 July 2009

Reviewer: Kevin Fontaine

Reviewer's report:

I had the chance to review the materials. While I agree with reviewer 1 that the physical activity measure was less than ideal, I do not think it renders the manuscript unpublishable. In my view the authors acknowledge the limitation and the reader is able to interpret the findings accordingly.
