Reviewer’s report

Title: Uptake of health services for common mental disorders by first-generation non-Western migrants in the Netherlands

Version: 2 Date: 4 June 2009

Reviewer: Rolf Kleber

Reviewer’s report:

It has become a nice and attractive manuscript: relevant for mental health care and remarkably interesting results.

Suggestions and recommendations of the reviewer have been well taken and utilized quite well. The authors did a fine job.

Minor essential / discretionary revisions:

- a better term is mental disorders (not psychiatric disorders). Page 6.
- the introduction (page 6) shows a little redundancy.
- use more paragraphs in the discussion (especially the first paragraph is quite long now).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
