Title: Body Weight Dissatisfaction and Communication with Parents among Adolescents in 24 Countries: International Cross-Sectional Survey

Version: 2 Date: 8 January 2009

Reviewer: Susan K Riesch

Reviewer’s report:

Authors have addressed all reviewer concerns adequately. The idea of including the not present father or mother is somewhat nagging to me even though the percentages between these and difficult to talk with parents are similar. If it were my work, I would probably exclude the males and females who report they do not have or see a parent. Other than that issue, I am recommending publication.
