Reviewer's report

Title: Attitudes to kidney donation among primary care users in rural Crete, Greece

Version: 1 Date: 3 August 2008

Reviewer: Antonio R Ríos

Reviewer's report:

I read with interest the article of Emmanouil K Symvoulakis et al “Attitudes to kidney donation among primary care users in rural Crete, Greece”.

It is a good article. The methodology is correct. The discussion is good and the authors present the limitations of the study.

The bibliography is good.

The only problem is the generalization of these results to the other countries.

Level of interest: An article of importance in its field.

Quality of written English: Acceptable.

Statistical review: No, the manuscript does not need to be seen by a statistician.
