Reviewer’s report

Title: The incidence of co-morbidities related to obesity and overweight: A systematic review and meta-analysis

Version: 3 Date: 18 February 2009

Reviewer: Evan Atlantis

Reviewer's report:

I’m generally satisfied with these changes. Several search terms for central obesity could have been used, including visceral, abdominal, and waist circumference, WC etc. But this is a discretionary issue.

Page 4, should read "..produce more precise estimates of risk associated with overweight and obesity."

Page 6, should define “Western country”.
