Reviewer’s report

Title: Bilateral pleural effusion and interstitial lung disease as unusual manifestations of Kikuchi-Fujimoto disease: case report and review of the literature

Version: 3 Date: 21 July 2010

Reviewer: fevzi altuntas

Reviewer’s report:

This is a well written and interesting paper describing the first report of bilateral pleural effusion and interstitial lung disease in Kikuchi-Fujimoto’s disease. Some discretionary revisions may be done in the manuscript.

1. “Kg” should be corrected to “kg” (page 4; line 22)
2. What is the etiology of hyperthyroidism in this patient? It may be a relationship with KFD if it is otoimmun thyroiditis (e.g. Hashimoto’s Disease).

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
