Reviewer's report

Title: Smoking cessation can improve quality of life among COPD patients: Translation and validation of the clinical COPD questionnaire into Greek

Version: 3 Date: 25 January 2011

Reviewer: Thys van der Molen

Reviewer's report:

The manuscript has been improved after the first revision. My only comment is that I would like to see in the results the changes in CCQ total and domains before and after smoking cessation and not only the P value of these changes.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
