Reviewer's report

Title: Predictive value of daily living score in acute respiratory failure of COPD patients requiring invasive mechanical ventilation: a pilot study.

Version: 1 Date: 19 July 2012

Reviewer: Raymond Farah

Reviewer's report:

The study is good and acceptable but the sample is small
I think that is better to give us the ADK values of all the ventilated patients with IMV and those without ventilation

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
