Reviewer’s report

Title: Bone Marrow-Derived Progenitor Cells in End-Stage Lung Disease Patients.

Version: 3 Date: 4 July 2013

Reviewer: Ivan Bertoncello

Reviewer's report:

I thank the authors for their diligence in responding to my comments, and am satisfied that the revised manuscript has addressed my concerns.

I have noted the following minor typographical errors in the revised manuscript:

Pg.4 (first line): "..were found to were found preferentially..."
Pg.6 (3rd line): "..with an AlexaFluor 647 secondary [antibody]...."
Pg.18 (lines 7/8): Perhaps rephrase "...seen in CF, which, warrants further investigation.." to read " seen in CF. This warrants further investigation."

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
