Reviewer's report

Title: Modulation of the oscillatory mechanics of lung tissue and the oxidative stress response induced by arginase inhibition in a chronic allergic inflammation model

Version: 4 Date: 22 April 2013

Reviewer: Nicholas Kenyon

Reviewer's report:

The authors had addressed each of the concerns. While some questions could not be fully answered because of a lack of study samples at this point, a significant amount of statistical data has been reworked.

Overall, this is a very intriguing study. I have no further comments.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare I have no competing interests.
