Title: Efficacy and safety of moxifloxacin in community acquired pneumonia: a prospective, multicenter, observational study (CAPRIVI)

Version: 1  Date: 26 March 2014

Reviewer: Sylvia Knapp

Reviewer's report:

This is well written study performed in more than 2000 patients from South-Eastern Europe, where the efficacy of moxifloxacin in CAP patients was evaluated. These data suggest, just like in other countries as well, that moxifloxacin at the recommended dose is efficient.
