Reviewer's report

Title: Effects of sex hormones on bronchial reactivity during the menstrual cycle

Version: 3
Date: 20 January 2014

Reviewer: EMILIO MARANGIO

Reviewer's report:

Major points:
1. Lack of quantitative data in the abstract.
2. The novelty of the study is not clearly stated in the Introduction section. Authors should provide that.
3. In the Results section, the authors show the allergic profile of the subjects of the study. For simplification, I suggest that the authors convert this data into a chart or table.
4. English needs to be corrected throughout the text (mainly Materials and Methods section).
5. The discussion seems too long, authors should consider to reduce it and make it easier to follow.

Minor points:
1. The format of some references should be reviewed.
2. The description of functional methods is unclear.
3. Revise all the figures’ captions.
