Reviewer's report

Title: Mobile-phone-based Home Exercise Training Program Decreases Systemic Inflammation in COPD: A Pilot Study

Version: 2 Date: 5 August 2014

Reviewer: XAVIER SOLER

Reviewer's report:

Comments;
The study of the ‘Mobile-phone based home exercise training program decreases systemic inflammation in COPD’ is relevant. Exercise training, and methods to improve patient compliance as well as test their clinical effects is therefore important.

Minor essential revisions; Focusing (and shortening) the discussion will increase the interest of the reader.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
