Reviewer's report

Title: Non specific pattern of lung function in a respiratory physiology unit: causes and prevalence: results of an observational cross-sectional and longitudinal study

Version: 3
Date: 5 August 2014

Reviewer: Paul Scanlon

Reviewer's report:

The authors have satisfactorily responded to my previous comments. I suggest that if you use the term "complex restrictive pattern" that you reference one of the two abstracts in which it was described (full manuscript description is not yet published):

or

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I have no competing interests.
