Reviewer’s report

Title: Genetic polymorphisms and risk of recurrent wheezing in pediatric age

Version: 3  Date: 3 June 2014

Reviewer: Vytautas Usonis

Reviewer’s report:

The question posed by the authors well defined. Methods appropriate and well described and the data are sound. The manuscript adhere to the relevant standards for reporting and data deposition. Discussion and conclusions are well balanced and adequately supported by the data however limitations of the work are not stated. The title and abstract accurately convey what has been found. The writing is clear and acceptable.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
