Reviewer's report

Title: Quality of life is associated with physical activity and fitness in cystic fibrosis

Version: 2
Date: 8 December 2013

Reviewer: Craig Williams

Reviewer's report:

I am satisfied with the amendments made by the authors.

Major revision

However, I would recommend that the peak Vo2 relative values are presented i.e., VO2peak: male: 41.0±6.7 ml/kg/min; female: 33.9±6.6 ml/kg/min BUT for Wmax the authors should present as absolute watts (W) not relative as indicated in their responses: male: 3.30±0.62 W/kg, female: 2.92±0.52 W/kg.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
