Reviewer's report

Title: Resource use by patients hospitalized with community-acquired pneumonia in Europe: analysis of the REACH study

Version: 2 Date: 16 July 2013

Reviewer: Adamantia Liapikou

Reviewer's report:

It is a very well written article.
The only thing i need is the reasons for modification of antibiotic treatment and how it has been modified? Escalation or de-escalation?
Maybe a table about this crucial question is important.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
