Reviewer's report

Title: Internet access and use by COPD patients in the National Emphysema/COPD Association Survey

Version: 1 Date: 13 September 2013

Reviewer: Yan Tian

Reviewer’s report:

This manuscript addresses an important topic: COPD patients’ Internet access and use. It is well organized and well written. It provides important understandings about digital divide and disparity among COPD patients. I would suggest the authors to further elaborate on both the theoretical and practical implications of the findings.

(Minor Essential Revisions)

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
