Reviewer's report

Title: Influence of condensation temperature on selected exhaled breath parameters

Version: 2 Date: 8 August 2005

Reviewer: Dariusz Nowak

Reviewer's report:

General

-----------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
All the questions have been answered and all important problems corrected.

-----------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
Satisfactory explanation

-----------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision
