Reviewer's report

Title: Hepatocyte and Keratinocyte growth factors and their receptors in human lung emphysema

Version: 3 Date: 9 September 2005

Reviewer: Alvar Agusti

Reviewer's report:

General
I think that the authors have dealt satisfactorily with all the criticisms I raised. Thus, in my opinion, the paper is now acceptable for publication. I thank them for value my comments.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No
