Reviewer's report

Title: Aerosolized Amikacin for Treatment of Pulmonary Nontuberculous Mycobacterial Infections: An Observational Case Series

Version: 1 Date: 26 December 2006

Reviewer: thomas roy

Reviewer's report:

General
This small, but interesting, trial treats MAC infection. The reader would be better served if the title, manuscript, and conclusions applied aerosolized amikacin therapy to "MAC infections" rather than the more inclusive term implied by "NTM"

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)
None

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)
None

Discretionary Revisions (which the author can choose to ignore)
As above

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
