Reviewer's report

Title: Gene Expression in Lungs of Mice Lacking the 5-hydroxytryptamine Transporter Gene

Version: 3 Date: 21 January 2009

Reviewer: Luc Maroteaux

Reviewer's report:

Although the authors have improved the introduction and discussion of the manuscript, it is still surprising that the genes with the highest change in expression between +/- and -/- mice have not been analyzed in the present study. The quality of the Western blot that is suppose to validate the findings is still very low.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
