Reviewer’s report

Title: No long-term impact of low-energy wrist fracture on health-related quality of life and global quality of life. A case-control study.

Version: 1 Date: 26 April 2009

Reviewer: Hiroshi Hagino

Reviewer’s report:

Minor Essential Revisions

Major concern is the selection of the control subjects. It is not clear how the authors recruited the control participants. This point is crucial for this study.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
