Reviewer's report

**Title:** Assessment and management of neurogenic claudication associated with lumbar spinal stenosis in a UK primary care musculoskeletal service: a survey of current practice among physiotherapists

**Version:** 4 **Date:** 27 August 2009

**Reviewer:** Annette Harte

**Reviewer's report:**

My comments have been well addressed however only one problem the author states that he has added % and numbers into the text to be consistent with tables but this is not consistent throughout all the text and needs to be checked.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare i have no competing interests
