Reviewer's report

**Title:** A randomized single blind crossover trial comparing leather and commercial wrist splints for treating chronic wrist pain in adults.

**Version:** 1  **Date:** 2 July 2009

**Reviewer:** Bayram Unver

**Reviewer's report:**

In my opinion the article does not worth publishing for the article does not contribute to the literature in the presents of the article by Haskett S. et al. (this is sixth reference). The number of the patients, the number of the splints, the follow-up period, etc. are more than the paper of Thiele JR. et al. In brief, I think the paper should be rejected.

**Level of interest:** An article of insufficient interest to warrant publication in a scientific/medical journal

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
