Reviewer's report

Title: Association between knee alignment and knee pain in patients surgically treated for medial knee osteoarthritis by high tibial osteotomy A one year follow-up study

Version: 5 Date: 29 October 2009

Reviewer: Andrew Teichtahl

Reviewer's report:

The authors have done well to address the issues raised.

While the discussion reads better, it is still relatively disjointed in parts. Nevertheless, this should not detract from it being of a publishable standard.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
