Reviewer's report

Title: Myoblast sensitivity and fibroblast insensitivity to osteogenic conversion by BMP-2 correlates with the expression of Bmpr-1a

Version: 3 Date: 18 February 2009

Reviewer: Charles Gersbach

Reviewer's report:

I am satisfied by the authors' revisions of the manuscript and believe that the article is now suitable for publication. However, it should be brought to the authors' attention that although they changed Figures 1 & 2 to straight line graphs, Figure 4 remains unchanged and contains inappropriate interpolations. I suggest that the authors make the same changes to the data in Figure 4 for consistency.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
