Reviewer’s report

Title: Prevalence of fibromyalgia in low socioeconomic status population

Version: 4 Date: 8 March 2009

Reviewer: Stefan Bergman

Reviewer’s report:

Thank your for considering my previous concerns and taken these into account, both in an extensive covering letter and most important in manuscript changes. I now find the manuscript to be much easier to follow and the findings possible to compare with other populations. There is a need to check the language in some of the revisions.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
