Reviewer's report

Title: Intra-articular adhesions of Temporomandibular Joint ----Arthroscopic Views and Clinical Perspectives

Version: 2 Date: 13 March 2009

Reviewer: Khalid Almas

Reviewer's report:

The manuscript is an interesting report of hospital population from TMJ clinic. It would be helpful for the clinicians to know about the prevalence of Intr-articular adhesions of TMJ. The manuscript is well written. It has some typos and some incomplete sentences. The authors could take care of those. Only one recommendation is that the table no. 1 should be presented in bar chart.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
