Title: Postural changes in women with chronic pelvic pain: a case control study

Version: 3 Date: 27 January 2009

Reviewer: Pallavi Latthe

Reviewer's report:

Minor discretionary revisions

Abstract:
Replace “We therefore determined the frequency of postural changes in women with CPP2 with- We aimed to determine if the frequency of postural changes was higher in women with CPP than healthy subjects.

Conclusion
We have shown here that it is possible to determine the frequency of postural changes in women with CPP using only clinical examination
- it should read- From this study we conclude that postural changes are seen more frequently in women with CPP

Minor essential revision:
To replace “CCP” with “CPP” on page 7 before conclusion

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
