Reviewer's report

Title: Effectiveness of physiotherapy exercise following hip arthroplasty for osteoarthritis: a systematic review of clinical trials.

Version: 1 Date: 6 February 2009

Reviewer: V Karatosun

Reviewer's report:

In the present study, the clinical trials about effectiveness of physiotherapy exercise following hip arthroplasty for osteoarthritis were investigated. My comments are as follows:

-The research question posed by the authors well defined.
The study is suitable for the searching criteria.
The study is suitable for the selection criteria.
Validity assessment, data assessment and quality assessment which were used in this study is reliable and suitable.
Their comments are enough.
Their conclusions are useable.
The strengths and limitations of the work clearly stated.
The title and abstract is suitable for the study.
The writing is acceptable.

In my opinion this study in this form is suitable for publication (Accept without revision).
