Reviewer's report

Title: Effectiveness of physiotherapy exercise following hip arthroplasty for osteoarthritis: a systematic review of clinical trials.

Version: 2 Date: 12 May 2009

Reviewer: Cindy Veenhof

Reviewer's report:

Discretionary revisions:
Although the authors explained that the UK-system probably differs from other countries, I still disagree with the authors that post-operative interventions include interventions which started even up to 2 years after the surgery.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
