Reviewer’s report

Title: Alterations in Osteoclast Function and Phenotype Induced by Different Inhibitors of Bone Resorption - Implications for Osteoclast Quality

Version: 3 Date: 24 February 2010

Reviewer: Elizabeth Bradley

Reviewer’s report:

The authors have addressed all of the revisions identified in the initial review, either through incorporation of new data (zymograph quantitation) or through a more in depth discussion. Therefore, I feel this article is suitable for publication in its current form.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
