Reviewer's report

Title: Changes in the flexion-relaxation response induced by hip extensor and erector spinae muscle fatigue.

Version: 3 Date: 20 May 2010

Reviewer: Christophe Demoulin

Reviewer's report:

Authors have answers to all my questions and I appreciate the revised manuscript.

My only comment is about the Figure 2:
I suggest them (discretionary revision) to add in the figure 2 or in its legend what the big black dot/point represent (i.e.: T10-L1, L1-L2, PSIS,...).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
