Reviewer's report

Title: Identification of symptom and functional domains that fibromyalgia patients would like to see improved: a cluster analysis

Version: 1 Date: 25 March 2010

Reviewer: Kati Thieme, PhD

Reviewer's report:

The present study is very important for the determination of subgroups in fibromyalgia (FM) regarding symptoms and functional domains.

The chosen methods applied on an impressive large sample with 788 FM patients are significant reliable and valid, the results are reported in a clear and understandable way and the discussion is focused on the relevant topics.

Level of interest: An exceptional article

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
