Reviewer's report

Title: Identification of symptom and functional domains that fibromyalgia patients would like to see improved: a cluster analysis

Version: 1 Date: 9 April 2010

Reviewer: Michael Spaeth

Reviewer's report:

Since my questions/comments from the first submission to AR&T have been referred to, and since sufficient answers/modifications have been given/done sufficiently, I do not have to add any further comments/queries.

This is a very interesting analysis, giving new insights and helping to understand the whole symptomatology better. Good work!

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
