Reviewer's report

Title: An Asian viewpoint on the use of vitamin D and calcium in osteoporosis treatment: Physician and patient attitudes and beliefs

Version: 3 Date: 9 September 2010

Reviewer: Tuan Nguyen

Reviewer's report:

Many thanks for the revised manuscript and the authors' response to my comments. I have no further comments. However, I would like to draw the authors' attention to a recent study in Vietnam where it was shown that ~46% of women and 20% of men had vitamin D insufficiency. It should be referred to in the authors' work.

Ho-Pham LT, Nguyen ND, Lai TQ, et. al Vitamin D status and parathyroid hormone in an urban population in Vietnam. Osteoporos Int. 2010 Apr 23

Level of interest: An article whose findings are important to those with closely related research interests
