Reviewer’s report

Title: Management of Giant Pseudomeningocele after Spinal Surgery

Version: 4  Date: 22 January 2010

Reviewer: Frank Feigenbaum

Reviewer’s report:

Minor Essential Revisions
The authors responses to the queeries are noted and excepted, with the exception of the sentence on page 2, lines 5-7. This sentence is confusing and it is still not clear whether this was a prospective or retrospective study. The article will also need syntax improvement, most likely at the editorial level.
Frank Feigenbaum, MD

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
