Reviewer's report

Title: Torsional stability of interference screws derived from bovine bone - a biomechanical study

Version: 6 Date: 10 April 2010

Reviewer: Mirco Herbort

Reviewer's report:

The mentioned critics and hints have been considered by the authors. After sufficient correction this study is worth a publication in BMC Musculoskeletal Disorders.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
