Reviewer's report

Title: Individuals with chronic low back pain have greater difficulty in engaging in positive lifestyle behaviours than those without back pain: An assessment of health literacy.

Version: 2 Date: 12 May 2011

Reviewer: Pilar Escolar-Reina

Reviewer's report:

The authors are to be congratulated on the additional work that they have put into this manuscript. The scientific writing and method presentation are significantly improved and are a better reflection of the research that they have conducted.

Thank you for your work and perseverance with the writing and rewriting.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
