Reviewer’s report

Title: The relative efficacy of nine osteoporosis medications for reducing the rate of fractures in post-menopausal women

Version: 3 Date: 5 September 2011

Reviewer: Iñaki Imaz

Reviewer’s report:

The authors have properly addressed all suggestions and comments I provided. There is no any new suggestion for this second version of the manuscript. In my point of view this current version of the manuscript is suitable for publication. Congratulations to the authors for their fruitful effort.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
