Reviewer's report

**Title:** Consequences of spinal pain: Do age and gender matter? A Danish cross-sectional population-based study of 34,902 individuals 20-71 years of age.

**Version:** 2  **Date:** 30 December 2010

**Reviewer:** Annette Leclerc

**Reviewer's report:**

I agree with this modified version of the paper. For some of the point which I had raised, a rather long discussion would have been necessary, it would have made the paper much longer, I agree that it is not feasible in this paper. Hence, it's OK for me!
