Reviewer's report

Title: 10 year follow up after Roux-Elmslie-Trillat operation in case of patellar instability

Version: 2 Date: 7 September 2010

Reviewer: Juan Contreras

Reviewer's report:

Page 3. Lines 17-21. Perhaps if the authors could clarify more soundly the selection criteria and the indications. How many were excluded? Ho many were lost to follow-up?.

What was the non-operative treatment in these patients and for how long?

Were patients with moderate to severe degenerative changes included in the study?

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
