Reviewer's report

Title: Medical decision-making among Hispanics and non-Hispanic Whites with chronic back and knee pain: A qualitative study

Version: 1 Date: 6 December 2010

Reviewer: Shumei Yun

Reviewer's report:

The manuscript is well written. The study was trying to answer several important questions about preference-based healthcare decision making among Hispanics and non-Hispanic Whites. There are several limitations in the design, which were appropriately acknowledged by the authors in the discussion section. The study has some interesting findings, which if confirmed further in research, can be very useful in the development of interventions targeting Hispanic population.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
